DEVESH SHARMA

B.Tech CSE (AI/ML) Student & Full-Stack Developer

Greater Noida, India • sharmadevesh040@gmail.com • +91 98765 43210 • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Proactive and detail-oriented B.Tech Computer Science student specializing in AI/ML with a proven track record of architecting scalable web applications and AI-driven solutions. Experienced in developing responsive interfaces with React, robust backend APIs, and integrating machine learning pipelines. Passionate about writing clean, efficient code and contributing to high-impact software engineering teams.

WORK EXPERIENCE

Software Engineering Intern — Nexus Technologies June 2024 – August 2024 | Noida, India

- Architected and deployed responsive React dashboard modules, reducing page load latency by 28%.
- Constructed and documented RESTful API endpoints utilizing Python and Node.js for automated reporting.
- Integrated SQL query optimizations and indexing strategies that accelerated transaction lookups by 35%.
- Participated in daily Agile standups, code reviews, and Git version control workflows across team repositories.

KEY TECHNICAL PROJECTS

AI Farming Advisory Platform (Python, React, TensorFlow, FastAPI, PostgreSQL) Demo | Code

An intelligent precision-agriculture web platform providing localized crop recommendations, disease diagnosis, and real-time climate telemetry.

- Engineered an automated CNN image classifier with 93% accuracy to diagnose leaf blight and soil nutrient deficiencies.
- Designed an intuitive multilingual dashboard with React and Tailwind CSS, facilitating seamless usage for rural farmers.
- Implemented secure REST endpoints in FastAPI handling asynchronous inference requests with sub-300ms response times.

ResumeForge AI — SaaS Builder (Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL) Demo | Code

A production-grade AI-powered resume authoring application featuring real-time ATS scoring, keyword matching, and dynamic multi-template export.

- Constructed a multi-template rendering engine supporting 6 distinct layouts with instant JSON-driven state syncing.
- Devised an algorithmic ATS scoring system auditing keyword frequency, structural hierarchy, and typographical density.
- Built automated vector-text PDF and editable DOCX generation pipelines preserving high-fidelity layout formatting.

Automated Vehicle Crash Detection System (Python, OpenCV, Raspberry Pi, Twilio API, Flask) Code

IoT and computer vision system detecting vehicular collisions and transmitting instant geolocated distress alerts to emergency services.

- Trained motion optical flow algorithms and accelerometer threshold triggers to reliably detect impact dynamics.
- Integrated Twilio SMS and location webhooks to dispatch automated coordinates within 5 seconds of incident trigger.

EDUCATION

Galgotias University 2021 – 2025

B.Tech in Computer Science and Engineering (Specialization in AI & ML) | 8.7 / 10.0 CGPA

Coursework: Data Structures & Algorithms, Database Systems, Artificial Intelligence, Deep Learning, Cloud Computing, Object-Oriented Software Design

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C++, SQL

Frameworks: React, Next.js, Node.js, FastAPI, Express, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Developer Tools: Git, GitHub, Docker, Postman, VS Code, Linux / Bash

Cloud & DevOps: AWS (S3, EC2), Vercel, Supabase

AI / ML: TensorFlow, Scikit-Learn, OpenCV, Pandas, NumPy, Prompt Engineering

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services (AWS) (2024)
- Machine Learning Specialization — DeepLearning.AI / Coursera (2023)

HONORS & ACHIEVEMENTS

- 1st Place Winner — University Annual Hackathon 2024 — Galgotias University Tech Fest

- Solved 350+ Problems on LeetCode & GeeksforGeeks
